Change log

Version	Date	Modification
08	25Feb19	Revision: <ul style="list-style-type: none"> - Suppression of Quick-test for Chromium (VI) – Priority 0 – internal use at members for non-regulatory screening - Entry of PFOS/PFOA in Priority 1 following non-compliances/complaints in 2018 - Phthalates transferred from Priority 1 to Priority 2 because of the absence of non-compliance since 2017 - Phenols (non-ethoxylated) and Dimethylformamide transferred from Priority 2 to Priority 3 - Aromatic amines: transferred from Priority 3 to Priority 2 with addition of PPD and aniline - Entry of siloxanes D4/D5 and D6 (SVHCs) - Perfluorinated: suppression of Fluoride detection by RX/EDX - Complete review of option for fire-proof leathers - PFOA: change of limit for REACH Annex XVII restriction : 0.025 ppb
09	14Feb20	Revision: <ul style="list-style-type: none"> - Complete review of the RSL (decision Technical Working Group – 16Oct19) - 3 testing priorities replaced by 1 single list - Addition of the list of regulations cited in the document and precision about extra-legal AQC requirements - Addition of AQC specific considerations for REACH SVHC, Proposition 65 California and EU POP - Precision of AQC requirements for sample preparation and sample pictures - Complete review of all chemical families and limits and indication of the strictest regulation
10	19Oct20	Revision: <ul style="list-style-type: none"> - REACH restriction proposal for allergens in leather in contact with skin: <ul style="list-style-type: none"> o Addition of allergenic disperse dyes (for information) including navy blue dye (1000 mg/kg) o Cobalt and Nickel: from total (ISO 17072-2) to extractible (ISO 17072-1) - Addition of DBB in organo-tins
11	01Sep21	Revision: <ul style="list-style-type: none"> - New entry in SVHC list: Transfer of Glutaraldehyde from metal free option to standard testing pack - New entry of SVHC list: limit for MCCP from “for information” to “1’000 mg/kg” and precision of CAS numbers related to this group of substances - New entry in SVHC list : Addition Bisphenol B with a limit of 1’000 mg/kg. Bisphenols A is also added with a limit of 1’000 mg/kg (SVHC) and Bisphenols AF, F and S added “for information” to prepare the potential REACH restriction for bisphenols. - Addition of 2-Methoxyethanol (SVHC) CAS No.109-86-4 - New REACH annex XVII for C9-C14 PFCAs (entry 68) - Suppression of disperse dyes and navy blue

Document	Title
MAQ016	Chemical Compliance Process

Associated document (level 2)

Document	Title
PRO002	Management of AQC Quality Control for leather

Scope of the document

This document defines the list of restricted dangerous chemical substances and testing requirements in the context of leather as specified by AQC.

For the definition of the limit present in this Restricted Substances list (RSL), AQC takes into consideration all the current international regulations for dangerous substances available and select the strictest limit. The list of chemicals present in this document has been selected on the basis of a risk-based approach completed by AQC experience and knowledge.

International regulations mentioned in this document are:

Abbreviation	Regulation	Country	Comment
16CFR1303	Ban of lead-containing paint and certain consumer products bearing lead-containing paint	USA	-
EU 2016/425	Regulation (EU) 2016/425 of the European Parliament and of the council of 9 March 2016 on Personal Protective Equipment	European Union	pH limits present in NF EN 420 norm Protective gloves - General requirements and test methods - Gants de protection
EU POP annex A	Regulation (EU) 2019/1021 of the European Parliament and of the Council on persistent organic pollutants	European Union	Annex A : Elimination
EU POP Annex B			Annex B : Restriction
GB 20400-2006	Leather and fur—Limit of harmful matter	China	-
JP112	Law on Control of Household Products Containing Harmful Substances	Japan	-
OChim	Ordinance on Protection against Dangerous Substances and Preparations	Switzerland	-
ORRChim	Ordinance on the Reduction of Risks relating to the Use of Certain Particularly Dangerous Substances, Preparations and Articles	Switzerland	-
Proposition 65	Safe Drinking Water and Toxic Enforcement Act	USA (California)	-
REACH XIV	Regulation (EC) no 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)	European Union	Annex XIV Substances subject to authorisation
REACH XVII			Annex XVII Substances subject to restriction
REACH SVHC			Substances of Very High Concern

Specific AQC consideration

In the column for regulation, “AQC” stands for extra-regulatory limit set by AQC in a pro-active way:

- “AQC” alone is applied for substances without known regulation
For some substances, AQC performs testing without limit (for information) or with a limit concentration
- (AQC) after a regulation indicate that the scope has been enlarged to leather by AQC or that the limit applied by AQC is lower than requested by the more stringent regulation.

Examples:

- TEPA (CAS 545-55-1)

AQC limit
REACH Annex XVII Entry 7 (AQC)

Entry 7 of REACH Annex XVII bans the use of this substance in textile only.
AQC applies extra-legal limit by also applying TEPA ban to leather.

- Organotins

AQC limit	Regulation
1 mg/kg of tin	REACH XVII entry 20 (AQC)

Entry 20 of the annex XVII of REACH limits certain organo-tins to 1000 mg/kg.

AQC Bracelet manufacturers apply an extra-legal limit of 1 mg/kg for total tin.

AQC limit for REACH SVHCs

Article 33(1) of REACH requires that a supplier of articles containing a SVHC included in the Candidate List for authorization in a concentration above 0.1% (w/w) has to provide relevant safety information to the recipients of these articles (Watch Brands). Upon request of a consumer, Watch Brands have to provide relevant safety information about the SVHC to this consumer (Article 33(2) of REACH).

This requirement is also present in Swiss ordinance OChim, article 71.

There is no regulatory requirement to limit SVHC content in articles to 1'000 mg/kg. Nevertheless, AQC Bracelet manufacturers limit all SVHC listed substances to 1'000 mg/kg in leather bracelet and also in leather before manufacturing.

AQC limit for Proposition 65

For substances listed in the Proposition 65 California, AQC limits take into account the limit in articles present in the case law of Proposition 65 and more precisely the limits indicated in the reformulation injunctions of settlements and judgements.

AQC considers in case law: leather articles and related articles to the watch bracelet but also any other article with a related exposure scenario (skin contact).

For substances without any indication of a limit in articles, AQC performs testing of a risk-based selection of substances potentially used for leather production and keeps available for Watch Brands all the data as a support for labelling decision.

AQC limit for EU POP

AQC limits for substances listed in Annex A (elimination) of the EU POP regulation is "not detectable" otherwise some specific limits are indicated for leather (ex: SCCP)

AQC limits for substances listed in Annex B (restriction) of the EU POP regulation is in accordance with the specific indications for leather (ex: PFOS)

General requirements for laboratory testing

- Sample picture

Picture of leather samples received by the laboratory have to be taken **without** plastic bag.

- Sample preparation

Leather sample preparation requested by AQC is the one indicated in the chapter "Sampling and sample preparation" of the testing methods indicated in the present RSL.

In case of reference to ISO 4044 only, grinding method should be selected as samples provided by AQC for bovine leather (A4) and alligator leather (8 sides) have a surface above 20x20 cm requested for grinding in ISO 4044.
